

**“Excitons in Confined Systems”** Ed: R. Del Sole, A. D’Andrea, and A. Lapicciarella (ISBN: 978-3-540-18707-3) has been selected for Springer Book Electronic Archives.

The book contains the proceedings of the international meeting on quantum confined excitons held at the CNR Research Area of Rome in Montelibretti, 13-16 , April 1987.

“The Springer Book Archives are an effort at Springer to breathe new life into older books—specifically those published between 1842 and 2005— by making them available in electronic formats.

The archiving project includes about 40 renowned imprints. ... With this initiative we will enable researchers all over the world to access a wealth of information via their libraries.

The individual books will not only be made available digitally, but also in print.

The Springer Book Archives affirms Springer's commitment to preserve valuable scholarly content, and your book plays an important role in this effort.”
